"Sustainability from the Start": An Online ESD curriculum for Early Childhood Education

This keynote launches a brand-new free online course: Sustainability from the Start - Education for Sustainable Development (ESD) in Early Childhood Education (ECE). Throughout the keynote, we will demonstrate how the course elucidates various aspects of sustainable development, converging these components into a holistic perspective. With the course, we aim to inspire and equip early childhood educators to cultivate a future of sustainable development.

Marie Fridberg is Associate Professor in Science Education at Kristianstad University and project manager for the Erasmus + project ESDforECE.

edChild is an award-winning Swedish EdTech company, represented by two of its founders, **Love Fredholm** and **Sofia Zätterström**.

A fact-based worldview for everyone

In my presentation, I will utilize accessible visualizations to showcase the evolution of our world over the past two centuries. These visuals will emphasize the remarkable progress humanity has made in terms of increased prosperity and extended lifespans, while also shedding light on the detrimental impact on our environment. Furthermore, the presentation will introduce practical tools and methods that can be easily adopted by individuals of all ages.

Olof Gränström is an expert in various domains as sustainable development, globalization, and fact-based decision-making. Olof Gränström was a project manager at the Gapminder Foundation, started by Professor Hans Rosling.

This project is funded by the European Union.
